The undersigned neighbors of the Saddle Mtn., L.P. Quarry, having had to endure the greatly negative impact upon our quality of life and property values since the Quarry commenced operations in 1990;

And noting that the Quarry operation is significantly out of compliance with a range of requirements (as per the Borough consultant), and noting that the Quarry contends that it has the right to unilaterally decide to go below the extraction limit of 370 feet, and that it does not have to comply with various requirements that the Borough believes do apply;

DO HEREBY PETITION, the Ringwood Borough Council to **take decisive and immediate legal action** to bring the Quarry operation fully into compliance with regulating municipal ordinance and related requirements.
